

**END-TO-END
MOBILITY SOLUTIONS**

ALWAYS PROTECTED. ALWAYS CONNECTED®

End-To-End Mobility Solutions

POWERED BY GDS® TECH™ WITH INTELLISKIN®

GDS® Tech™ is an enterprise device mounting ecosystem that provides rugged protection, charging, and data sync capabilities. This ecosystem is enabled by IntelliSkin®, a patented, one-of-a-kind protective sleeve that utilizes pogo pads for connectivity rather than USB ports. Paired together, GDS® Tech™ and IntelliSkin® deliver a workflow-centric experience and are purposefully built for cost-efficient upgrades, making them the preferred solution for industries such as material handling, transportation, field service, and more.

How it Works

IntelliSkin® Next Gen

The IntelliSkin® with GDS® Tech™ system is designed to protect both the device, and the device port by converting the connection point to ruggedized pogo pad contacts. No more plugging and unplugging, dirt, damage or debris interrupting your device's connection.

Built-in LED

Select IntelliSkin® cases have a built-in LED option for situations when you need a flashlight in a pinch.

Port Protection

IntelliSkin® is the only case system on the market that protects the device port and converts that connection point to ruggedized pogo pads for charging and data transfer.

Pogo Pin Connection

Unlock the GDS® Ecosystem™ with a large collection of docks built with an integrated Distictive D Shape™ pogo pin connector for a hassle-free user experience that helps increase efficiency.

Types of IntelliSkin®

IntelliSkin® Next Generation

Ultra-rugged and drop-protected made of polycarbonate shell and thermoplastic polyurethane frame.

IntelliSkin® Hard Case

Sturdy two-piece enclosure made of hard composite.

IntelliSkin® Thin-Case™

Low-profile connectivity and clean edges, for the working professional.

Next Generation Durability

IntelliSkin® Next Gen sleeves are MIL-STD-810H drop protection certified and protect the USB port from dirt, damage, and other debris.

Ergonomic Accessories

The GDS® Hand-Stand™ Hand Strap with Kickstand works with most tablet IntelliSkin® for an easy way to take advantage of workstation enablement.

Customize

Available Colors

Why Go Custom?

- ✓ Designate colored IntelliSkin®-wrapped devices that correspond with various teams, locations, or applications
- ✓ Enhanced visibility of devices can help with loss prevention and reduce the risk of accidents
- ✓ Reinforce brand identity

How it Works: IntelliSkin® IntelliSkin® Thin-Case™

The IntelliSkin® Thin-Case™ is the newest version of IntelliSkin®, sporting a sleek, low-profile design that fully encloses your device. The main difference between the new Thin-Case™ and the original IntelliSkin® is the introduction of the integrated pogo pad connector on the back. The placement of rear pogo pads unlocks the newest family of low-profile GDS® Uni-Conn™ Powered docking stations—perfect for the healthcare industry and mPoS retail applications.

Two Types of Available Connectors

Rear Pogo Pads

Rear connector for low-profile docking, ideal for wall mounted solutions and kiosks.

Bottom Pogo Pads

Standard Distinctive D Shape™ bottom connector, ideal for vehicle and desktop docks.

GDS® Uni-Conn™ Adapter with Hand Strap

How it Works

GDS® Uni-Conn™

GDS® Uni-Conn™ is a universal, snap-in docking system that eliminates the need for expensive device upgrades. With just an IntelliSkin®-wrapped device and a GDS® Uni-Conn™ adapter, you're ready to connect seamlessly. This system not only streamlines the upgrade process but also makes docking effortless. When it's time for your next device upgrade, remember: there's only **One Dock to Connect Them All™**.

GDS® Uni-Conn™ Adapters for IntelliSkin®

Unlock the potential of GDS® Uni-Conn™ by installing the adjustable button adapter (RAM-GDS-U1AU) or standard adapter (RAM-GDS-U1U) to the back of your IntelliSkin®.

Seamless Device Upgrades for the Future

When the time comes to upgrade devices in your fleet, a new IntelliSkin® is all that is needed—keep your existing dock.

NOTE: failure to install dock lever stop will void warranty.

Spring Loaded for Backwards Compatibility

A spring loaded version of the GDS® Uni-Conn™ dock is available for tablets outside the list of snap-in compatible IntelliSkins®.

How it Works

GDS® Tough-Dock™

The GDS® Tough-Dock™ is the toughest GDS® Dock™ for tablets, securing and protecting the entire exterior frame of an IntelliSkin®-wrapped tablet. Not only is the GDS® Tough-Dock™ tough, it's form-fitting modular design allows you to easily upgrade during device refreshes or peripheral updates. Tested and deployed by the world's most reputable enterprises, the GDS® Tough-Dock™ remains the most durable tablet dock on the market—perfect for withstanding harsh environments like material handling, waste collection, or heavy machinery.

Safety Standards

The GDS® Tough-Dock™ is a top-rated safety product complying with local, federal, and international forklift safety standards to keep your workers safe while on the job.

Positioning Markers

These alignment points are thoughtfully designed for a fumble-free docking experience and ensures proper alignment for a consistent connection.

Supports
RAM® NFC Extender
[pg.37](#)

Add-ons

The GDS® Tough-Dock™ offers enhanced modularity with easily upgradable add-ons, allowing you to get even more out of your docking station. Expand its functionality with temperature-regulating modules, NFC extenders, mounts, and other versatile options.

Peripheral Connector Options

GDS® Tech™ supports peripheral enablement and allow users to connect peripherals directly to their device. With a variety of accessories available in the GDS® Ecosystem™, you can easily swap as the needs of your company grow.

Case Study

RFID Compatibility with GDS® Tech™

First Student, a leading student transportation provider, has spent years curating top products to realize the Connected Highway vision for education. They've transitioned thousands of US districts to centralized vehicle telematics and student tracking in buses, using in-cab tablets, custom software, and RFID technology. To power this system, First Student partners with RAM® Mounts, Samsung, and student tracking software like SMART tag™, TylerTech, and EDULOG.

Locking GDS® Tough-Dock™ for Tab Active3 with RAM® NFC Reach™

The RAM® Mounts Solution

To deploy telematics, First Student needed secure vehicle docks with reliable power and peripheral connections. RAM® Mounts recommended the GDS® Tech™ system, known for its connective longevity. First Student found the GDS® system outperformed conventional mounts, thanks to IntelliSkin®, which protects devices and enables easy cleaning while maintaining a charge via pogo pin contacts.

First Student also required RFID or NFC devices for student tracking. The modular GDS® Docks™ and RAM® docking cups support peripherals like the SMART tag™ RFID reader and NFC Extender, all secured by RAM®'s customizable ball and socket mounts.

Case Study

High-Tech Recycling Smart Trucks

North America's largest recycler has developed automated recycling technology, deploying it in thousands of collection trucks. This AI-driven system identifies recycling challenges and improves efficiency. Studies show most consumers are confused about proper recycling, leading to mixed material disposal. The company's goal is to eliminate guesswork with its advanced technology.

The RAM® Mounts Solution

When smart trucks collect recyclables, live cameras and sensors scan materials, with AI identifying service improvements. Challenges include overfilled containers, missed bins, and incorrect recycling. Each driver uses a Samsung Tab Active3 with a RAM® Mounts docking solution. The organization chose RAM®'s GDS® Tech™ & IntelliSkin® for scalability, ruggedizing the system, keeping devices charged, and connecting tablets to vehicle gateways for AI and diagnostics data.

Case Study

Importance of Durability

When Georgia-Pacific determined that new devices were necessary to run the latest software and security updates required for their manufacturing plants, they kept two characteristics in mind: flexibility and ease of updates. As a global leader, custom applications and solutions are needed to drive innovation.

The RAM® Mounts Solution

The GDS® Tech™ ecosystem offered Georgia-Pacific a future-proofed solution for device protection, charging, and data sync while on the forklifts. The durability of the IntelliSkin® kept devices powered while safeguarding ports from damage caused by frequent plugging and unplugging.

GDS® CAN Bus

For the last few decades, RAM® Mounts has collaborated with the industry's best innovators to build the future of mobility. The key to a mobile workforce combines device, software, and docking solution. Every day our engineering teams look for ways to optimize product performance to seamlessly integrate into one another, making the lives of drivers all around the world easier, and business logistics scalable. That's why RAM® offers turnkey, rugged, cost-effective mounting solutions for ELD compliance. Depending on what device you are deploying, RAM® will either have the right solution ready to go or custom-build the right kit for you. Take advantage of upgrades like peripheral support, add-on accessories, and the award-winning GDS® Tech™ for connective longevity and reliability.

How it works

The GDS® CAN Bus allows users to simultaneously charge onboard ELDs and extract RAW CAN data to be read by third-party software, providing unparalleled flexibility and control over vehicle data.

Zebra Desktop Docks

Wrap your new Zebra ET40 or ET45 in an IntelliSkin® Next Gen protective sleeve to unlock all the features and benefits of the GDS® Ecosystem™. By sliding your tablet into an IntelliSkin®, an integrated USB connector converts power and data sync through pogo pad contacts. These contacts align directly to the pogo pins on all GDS® Docks™ for a seamless charging experience with the added capabilities of peripherals such as a keyboard, scanner, printer, and more.

The range of the GDS® Ecosystem™ doesn't stop with vehicles. Desktop charging docks are also available with both single and multi-port options. Not only can these desktop docks charge your devices up to 30% faster than traditional charging, but they also have device mirroring and ethernet sync capabilities. All of this is possible with the combination of a ruggedized, connective product line and the patented pogo pin technology — we call this the GDS® Reach™.

The distinctive "D" shape of the GDS® connector ensures proper docking alignment

GDS® Ergo™

The RAM® Skin™ and IntelliSkin® product lines are compatible with a variety of GDS® Ergo™ accessories that enable your tablet for field use. Make traveling with your tablet more comfortable and efficient by pairing your device with the GDS® Hand-Stand™—this combination hand strap and kickstand accessory allows you to take your device from the warehouse to the office and everywhere in between. Take advantage of mounting your tablet to ferrous surfaces with the GDS® Roto-Mag™ and the magnetic version of the GDS® Hand Stand™.

Designed with a comfortable fit for hands of all sizes in mind, the GDS® Hand Strap includes compatibility for gloved hands. It also features a 360-degree rotation so users can adjust to their ideal viewing angle.

Temperature Control

Located at the back of your dock is an empty housing for upgrading your mounting solution. This housing can accommodate various temperature modules provided by RAM® Mounts. Easily install either the RAM® Vent-Temp™, which connects to your vehicle's vents or the RAM® Temp-Right™, which provides regulated heat in extremely cold environments.

RAM® Vent-Temp™ Back Nozzle Attachment

Hot or cold air from your vehicle's air system enters through the RAM® Temp-Right™ nozzle, travels through flexible tube, and exits behind the docked tablet.

FEATURES

Low-profile docking station for electronic devices equipped with an IntelliSkin® protective case

The Desktop Dock features pogo pin contacts designed to match the pogo pads on IntelliSkin®-wrapped devices supporting USB Type-C data transfer and charging profiles

Power Delivery docks include a male to male USB Type-C cord which plugs directly into the back of the dock and to a Power Delivery charging source, or external hub

Universal Docks

Multi-Port Desktop Docks

The RAM® 6-Port Charging Dock was designed specifically to support up to six devices for simultaneous charging. These charging stations reduce the amount of charging cords needed to charge each device by consolidating power through one cord and provide each electronic device with its own charging bay to reduce clutter.

Additional Features

- 1 Supports devices that require power delivery
- 2 Steel weighted base with rubber pads creates strong hold on desktop
- 3 Integrated pogo pads with distinctive D shape™ connector
- 4 6-Port dock allows space for ergonomic accessories

Care & Maintenance

When it comes to protecting and maintaining your fleet of devices, regular care is important for long-term performance. Learn more about our recommended cleaning, care, and maintenance below.

For Maintenance

Use 70% Isopropyl Alcohol for routine maintenance and light buildup of debris.

Cleaning Agent
+ Q-tips

For Connection Issues

Use DeoxIT® Pen for extreme buildup of debris, or if you're experiencing loss of connection.

DeoxIT Pen

Cleaning

Uncap your DeoxIT® Pen, or wet the end of your Q-tip with the cleaning agent and twist in a circular motion against each pogo pad 2-4 times each pad. Check pad for cleanliness and repeat the process until thoroughly cleaned.

Note: After using DeoxIT®, perform one cleaning with isopropyl alcohol.

General Care & Maintenance

For spills or accumulated dirt on the GDS® Dock™ pogo pins, gently clean using contact cleaner or alcohol on a cotton swab. Use contact cleaner or alcohol with a stiff brush to clean IntelliSkin® contacts.

For industrial and heavy use environments, clean pogo pins and contacts on a regular basis.

3-year warranty on all electronic components/Lifetime Warranty on all non-electronic components

The exclusive NPI Lifetime Warranty states that all GDS® non-electronic components and parts are warranted against defect in materials and workmanship for the life of the product or part. NPI's Lifetime Warranty covers the product or its components only. The mount device is not covered under the Lifetime Warranty and will not be replaced if damaged as a result of mount failure. This warranty is expressly limited to persons in the United States, and all foreign countries who purchase GDS® for resale or use in the ordinary course of the buyer's business. This warranty does not cover any product or part that has been abused, worn out, heated, ground or otherwise altered, used for a purchase other than that for which it was intended, or used in a manner inconsistent with any instruction regarding its use.

RAM-GDS-DOCK-D1AU

The Adjustable GDS® Desktop Charger supports a variety of devices including tablets, smartphones, phablets, devices wrapped with IntelliSkin®, or any device compatible with GDS® technology.

RAM-GDS-DOCK-D1U

Heavy-duty docking and charging base for any device equipped with an IntelliSkin® sleeve including electronic devices. It provides HD data connectivity and an extra-heavy base for stability of larger devices and frequent docking and undocking common in commercial applications.

RAM-GDS-AD1U

The Snap-Con™ GDS to Micro USB 2.0 Adaptor enables on the go charging and data connectivity of any GDS® compatible device, including devices wrapped in IntelliSkin®, using an included Micro USB 2.0 cable.
