About RAM® Mounts

RAM® Mounts manufactures rugged and versatile mounting systems for phones, tablets, and other mobile devices that can be attached nearly anywhere. Unlike other mounts on the market, RAM® allows you to secure devices where you need them most. The unique design of the RAM® Mounts system provides quick installation, adjustability, strength, vibration damping, and durability—all at a low cost. Backed by a lifetime warranty, RAM® uses powder-coated, marine-grade aluminum with lightweight and high-strength composites, stainless steel hardware, and rubber balls.

The RAM® Difference

Premium Design

The rubber ball and socket design of our mounting systems offers a secure hold, with near-infinite adjustability and vibration damping for the most demanding environments. With thousands of components trusted by users around the world, we've been able to design and develop mounting solutions that consumers and companies previously only dreamed were possible.

Customizable

Take your phone mount from your truck to your boat, or mix and match components to create your ideal mount. Because of the modularity of the RAM® system, you can customize your solution to fit your specific needs in almost any application.

Quality Materials

A premium design deserves the highest quality materials available, from rubber and stainless steel to high-strength composites and marine-grade aluminum. Our facilities—including powder coating, die casting, rubber injection molding, and shock and vibration testing—help us deliver on this promise to bring you inventive mounting solutions.

Lifetime Warranty

It's simple. Our reputation as the leader of premier mounting systems means if we build it, then we guarantee it. We're confident in the quality of our products, and with our warranty, you can be too.

*1-3 year warranty on electronics, including powered docks

National Products, Inc. (NPI)

Introduced in 1990, National Products, Inc. (NPI) quickly became the leading manufacturer of rugged and versatile mounting solutions. RAM® Mounts has grown to offer approximately 5,000 modular components—the most innovative product line of its kind for nearly any application and device, including phones, tablets, GPS systems, laptops, marine electronics, printers, radios, and much more.

In addition to RAM® Mounts, NPI is also the creator of award-winning IntelliSkin® sleeves and GDS® Technology™ products. IntelliSkin® sleeves ruggedize a wide range of consumer phones and tablets, while the GDS® Ecosystem™ provides users the ability to securely charge, dock, and sync devices in the most demanding environments.

NPI is proudly located in Seattle, Washington in the same neighborhood where the company was started.

Partner with RAM® Mounts

Here at RAM® Mounts, we believe that unfathomable things are possible with ingenuity. With a portfolio of more than 5,000 SKUs paired with innovative engineers and in-house product experts, we have the tools and expertise needed to create solutions that you didn't know were possible. We have the ability to solve your mounting challenges quickly, efficiently, and cost effectively.

RAM® In The Field

RAM® + Zebra in Material Handling

The combination of the industry standard RAM® Mounts™ and GDS® Ecosystem™ enables the connected associate philosophy. From forklift to pick cart, this ecosystem of products installs a turnkey solution to your enterprise, improving the workflow of your warehouse and setting the framework for standardization. No matter the vehicle, choose from a wide variety of compatible mounting and dock configurations, or let our industry experts build the right solution for you.

RAM® + Zebra in Public Safety

RAM® Mounts is the leader in rugged vehicle mounting, a tried and trusted partner of the public safety industry for over two decades. With custom RAM® No-Drill™ mobile workstations for tablets, outfitting a fleet of Interceptors, local fire engines, or government work trucks is an easy task. These vehicle mounts and RAM® Form fit locking docks paired with Zebra's ET8x 2-in-1 tablet and foldable keyboard, RAM® offers lean laptop replacement kits for your vehicles.

New GDS® Roto-Mag™ for Zebra ET4x 8" & 10"

The GDS® Roto-Mag™ 3-in-1 Accessory for Zebra ET4x Enterprise Tablets replaces the tablet's battery plate to enable the included GDS® Roto-Mag™ Grip Handle accessory. This add-on works with both Zebra ET4x models wrapped in the Zebra Rugged Frame, or an IntelliSkin® protective case using the existing hardware. This ergonomic accessory is a lightweight and low-profile hand grip that rotates 360-degrees for an on-the-go experience. Utilize the integrated elastic hand strap for a comfortable grip on the tablet.

New RAM® Powered Docks for Zebra ET60/ET65

Introducing new RAM® Mounts for the Zebra ET60 & ET65 rugged 2-in-1 tablet. Not only are these ET60/ET65 docks built for reliability, but they also come equipped with brand new features that compliment the innovative design of device itself. Features like self-aligning dock pads, heated pogo pins, keyboard latch, and CAC reader accessibility help you tackle everyday tasks without skipping a beat. Whether you're in public safety, warehousing, or out in the field, Zebra trusts RAM® Mounts to deliver an ultra-rugged product line that extends the life of your ET60/ET65.

FEATURES

Self-Aligning Dock Pads

Unique triple-molded technology provides enhanced tablet contact to pogo pin alignment, plus additional shock and vibration absorption capability.

Patent Pending

Heated Pogo Pins

Optional heating elements provide the necessary heat required to prevent pogo pins from locking up, allowing them to operate in wet and freezing environments.

Patent Pending

CAC Reader Access

Cut out on the side of the dock giving access to the Zebra CAC reader with the ability to open/close the CAC reader door.

Patent Pending

Keyboard Compatible

Docks equipped with a unique latch that allows the keyboard to open and close independently while the tablet remains docked.

New GDS® Tech™ for Zebra Handheld Computers

Device Protection + Up to 30% Faster Charging

Keep the same benefits of GDS® Tech™ and IntelliSkin® for tablets, enabled for handhelds. Protect your Zebra handheld PC and its charging port by wrapping in an IntelliSkin® protective sleeve. This sleeve enables a seamless docking experience by instantly connecting the device to a charging source while docked in a GDS® vehicle or desktop docking station. The GDS® and IntelliSkin® ecosystem installs a turnkey solution into your business, improving the mobility of your warehouse and setting the framework for standardization.

Patented docking connector technology protects the charge port and increases work efficiency when paired with GDS® Docks™

New RAM® Powered Dock for Zebra TC8300 + MC9300

Designed to enhance the world's most revolutionary enterprise touch computer. RAM® has integrated features set specifically to this device, delivering maximum application performance, ease of use, data capture, security, and manageability - all in one revolutionary durable design with unparalleled ergonomics. Your workers will experience superior comfort, leading to a remarkable boost in workforce productivity. Take advantage of pogo pin docking technology to ensure seamless charging and connective experience, allowing your workers to focus on their tasks with minimal disruptions.

Heated Pogo Pins

Heating elements provide the necessary heat required to prevent pogo pins from locking up, allowing them to operate in wet and freezing environments.

Patent Pending

Easy Docking

This holder is spring-loaded, making it easy for one-handed docking and removal. Securing the device from both ends allows safe docking position at any angle.

Pogo Pin Charging

Protect the charge port and increase efficiency by utilizing the device's pogo pad docking contacts — simply dock the scanner to keep the device charged and/or connected to peripherals.

Orientalional Mounting

With RAM® Compatibility™, customize your mount specific to your environment. RAM® recommends two unique mounting orientations depending on the intended application, enabled by the device's rotating touch screen.

Consolidate Your Workflow

Build a mobile workstation around your new powered scanner dock to keep all of your devices in one place. With peripheral enablement, you can tether all of your devices to the TC8300, or MC9300 simply by docking the device in the powered dock. This enhanced workflow is part of the Connected Warehouse movement to make work environments easier.
